CSI - LININGS - JANUARY 2006

E

EXPERT SERVICES - COMPETITIVE RATES

W

As we intimated in our previous Newsletters, CSI have been providing Partitions, Ceilings and Fire Protection to the Trade for 10 years now - we continue to employ a handful of teams of fitters who will build your enclosures or fire rate your floors on our behalf once our quote has been accepted!

S

We remain firmly committed to the notion that whilst our product costs money, our expertise is completely free and we continue to evolve a greater ongoing understanding of both the products and regulations which form the foundations upon which we all must build our reputations!

L

CSI are here to provide the trade with a first class linings service and it costs nothing to receive a quote from us!

E

NEW PRODUCT!

T

Following various discussions with our glazing contractor, CSI now has the capability of providing full height 'frameless' glass partitions in either straight or curved runs with a choice of door options!

T

E

R

NEW S L E T T E R

The product is (as you would expect) reasonably highly priced - however it compares extremely well against the established systems like Polar or Clarity (from Komfort and CCF respectively) and it lends itself to high profile areas such as Receptions, Showrooms, etc. where a modern clean look is important.

SAMPLES

Continuing the aesthetic theme, CSI are happy to provide samples of things such as wallcoverings, ceiling tiles or timber finishes for doors.

You might wish to consider upgrading to veneered MDF skirting to compliment door finishes - CSI can "run this up" at our joiners as well as providing high quality timbers such as Walnut, Cherry, Maple etc. - we can also quite happily provide book matched doors and overpanels should you wish.

TIMBER FRAMED

Finally, we have provided many bespoke timber framed partitions in the past - systems designed "from the ground up" in conjunction with the Trade client and our Project Managers!

Should you wish to discuss this high value option we would be delighted to meet with you or provide budget costs in order to give you an idea - again, if it can be "imagined" then we are happy to investigate the possibilities.
